Profile

I'm from Mendoza, Argentina. Have been studying web dev and programming for several years with great passion. My original background is product development at Wineries in Mendoza (wine production). I am looking for new opportunities in Web3, which I'm very passionate about. I have been studying about programming and blockchain technologies on a regular basis for several years now. Always trying to delve deeper into understanding protocols, the evolution of L2's over L1's, trying to wrap my head around how each project provides solutions to real world problems and utility. Looking forwards to becoming a part of this great industry.

Web 3.0 Knowledge

Blockchain Developer Bootcamp

Solidity, Truffle, Ganache, Hardhat, Infura, Metamask, Brownie, Scaffold Eth, Vyper

- [Consensys Academy](#)

Udacity Blockchain Nanodegree

Blockchain fundamentals, Hashing, Distributed Peer to Peer networks, Memory Pools, Consensus Mechanisms, PoW, PoS, Wallet types, private & public keys, blockchain transaction lifecycle, one way cryptographic functions, bitcoin core testnet transactions, block explorers, testnets (L1s BTC & ETH),

- [Udacity Inc.](#)

Web 2.0 Knowledge

FullStack Developer Nanodegree

SQL and Data modeling (Postgres), API Development and Documentation, Identity and Access Management, Server Deployment, Containerization (Docker) and Testing (Flask TDD). Front-end: HTML, CSS, JS. Back: Python (Django & Flask). RESTful APIs w/ Node.js & Express.js

- [Udacity Inc.](#)

Java FullStack Developer

JDBC, JPA, Spring, SpringBoot, Hibernate, SQL, HTML, CSS, Bootstrap, Thymeleaf, Git, Github

- [Egg Education (Mza, Argentina)](#)

Key Skills

- Advanced english proficiency (bilingual)
- Native spanish language proficiency
- Ability to work effectively within a team

- Goal driven and self motivated
- Written and oral communication skills

Previous Education

Univerity of California at Davis (UCDavis)
